

Maurits Fokkens

Software Developer

Hello! I'm Maurits, a software developer focused on DevOps and mobile development. I have been programming since I was 15 and have built experience through personal projects, education, internships, and professional roles. I enjoy combining software development with infrastructure, exploring new technologies, and building practical solutions that help people in their daily lives. Collaboration, supporting others, and continually expanding my technical skills are central to how I work.

EXPERIENCE

Albert Heijn Labs

DevOps Engineer (Working Student)

July 2026 - Present

Contributes to supporting a cohort of 25 interns by advising on their projects and helping with Albert Heijn-specific infrastructure. Also maintains infrastructure and researches emerging technologies using Kotlin, Spring Boot, Next.js, Python, LLM providers, and Azure.

Infrastructure / Mentoring / Technology Research / Azure

Albert Heijn Labs

DevOps Engineer Intern

February 2026 - July 2026

Worked in a multidisciplinary Albert Heijn Labs innovation team on confidential projects involving multimodal generative AI. Developed prototypes with Kotlin, Spring Boot, Next.js, Python, and FastAPI; several concepts are progressing toward production release.

Generative AI / Full-stack Development / Teamwork / Prototyping

KPN/XS4ALL

Klantexpert Tech (Technical Customer Expert)

October 2024 - January 2026

Progressed from general customer service to certified Klantexpert Tech, specializing in internet and Wi-Fi troubleshooting. Provided clear technical explanations and additional guidance to KPN and XS4ALL customers with complex questions.

Wi-Fi Troubleshooting / Technical Support / Communication / Problem Solving

ROC Mondriaan

Software Development Intern

August 2023 - June 2024

Shared end-to-end development responsibility with one other intern for two web applications for AEHT and Innotecs and one Flutter app released on iOS and Android. Used Symfony, PHP, Bootstrap, Flutter, Dart, HTML, CSS, and JavaScript. The delivered products remain in active use.

Symfony / PHP / Flutter / Dart / Project Delivery

EDUCATION

Amsterdam University of Applied Sciences HBO-ICT

2024 - June 2028 (expected)

Bachelor HBO-ICT, Software Engineering track. First-year certificate (propedeuse) awarded in June 2025.

ROC Mondriaan

Software Development

2022 - 2024

Diploma awarded after completing the three-year Software Development programme in two years.

Stedelijk Gymnasium Leiden Gymnasium

2016 - 2022

TECHNOLOGIES

Frontend Development

HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, TypeScript, React, Next.js

Backend Development

Node.js, Java, Kotlin, PHP, Python, Spring Boot, Symfony, FastAPI, Express.js

Mobile Development

Flutter

DevOps, Tools & Databases

Vite, Git, MySQL, PostgreSQL, Docker, Kubernetes, Argo CD
